Teacher answers & working

Inequalities · Basic Linear Inequalities

ALG-1962-L1 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

$x - 12 > -7$

Answer:

$x > 5$

Working:

Step 1: Start with the original inequality.

$x - 12 > -7$

Step 2: Use inverse operations to move terms away from x.

$x > -7 + 12$

Step 3: Write the simplified solution for x.

$x > 5$

S2

$7x - 12 < 13$

Answer:

$x < \frac{25}{7}$

Working:

Step 1: Start with the original inequality.

$7x - 12 < 13$

Step 2: Use inverse operations to move terms away from x.

$7x < 25$

$x < \frac{25}{7}$

Step 3: Write the simplified solution for x.

$x < \frac{25}{7}$

S3

$0.5x \leq 7$

Answer:

$x \leq 14$

Working:

Step 1: Start with the original inequality.

$0.5x \leq 7$

Step 2: Use inverse operations to move terms away from x.

$x \leq \frac{7}{0.5}$

$x \leq \frac{7 \cdot 2}{1}$

Step 3: Write the simplified solution for x.

$x \leq 14$

S4

$x - 9 \leq -2$

Answer:

$x \leq 7$

Working:

Step 1: Start with the original inequality.

$x - 9 \leq -2$

Step 2: Use inverse operations to move terms away from x.

$x \leq -2 + 9$

Step 3: Write the simplified solution for x.

$x \leq 7$

E1

$5x + 2 < -4$

Answer:

$x < \frac{-6}{5}$

Working:

Step 1: Start with the original inequality.

$5x + 2 < -4$

Step 2: Use inverse operations to move terms away from x.

$5x < -6$

$x < \frac{-6}{5}$

Step 3: Write the simplified solution for x.

$x < \frac{-6}{5}$

E2

$1.5\,x > -10$

Answer:

$x > \frac{-20}{3}$

Working:

Step 1: Start with the original inequality.

$1.5\,x > -10$

Step 2: Use inverse operations to move terms away from x.

$x > \frac{-10}{1.5}$

$x > \frac{-10 \cdot 2}{3}$

Step 3: Write the simplified solution for x.

$x > \frac{-20}{3}$

E3

$8x \leq 24$

Answer:

$x \leq 3$

Working:

Step 1: Start with the original inequality.

$8x \leq 24$

Step 2: Use inverse operations to move terms away from x.

$x \leq \frac{24}{8}$

Step 3: Write the simplified solution for x.

$x \leq 3$
