Teacher answers & working

Sectors, Arc Length and Area · Mixed Sector Links

GEO-2EB5-L3 · Student pages 1-3. Print at 100%, single-sided. Cut on dashed lines.

SA1

Find L and A

Answer:

$L = 12.57$ cm, $A = 25.13$ cm^2

Working:

$L = \theta/360 \times 2\pi r = 180/360 \times 2\pi \times 4$

$L \approx 12.57$ cm

$A = \theta/360 \times \pi r^2 = 180/360 \times \pi \times 4^2$

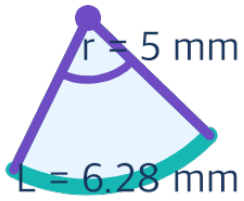

$A \approx 25.13$ cm^2.

SB1

Find A

Answer:

$15.71\ \text{mm}^2$

Working:

Use A = 1/2 rL when radius and arc length are known.

$A \approx 1/2 \times 5 \times 6.28$

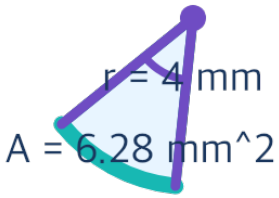

$A \approx 15.71\ \text{mm}^2$.

SC1

Find L

Answer:

3.14 mm

Working:

Use A = 1/2 rL when radius and sector area are known.

$L = 2A \div r$

$L \approx 2 \times 6.28 \div 4$

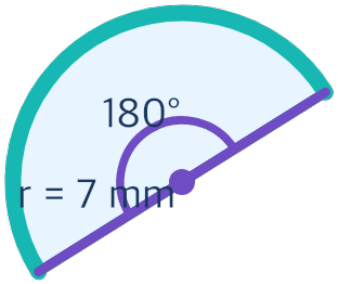

$L \approx 3.14$ mm.

SD1

Find L and A

Answer:

$L = 21.99$ mm, $A = 76.97$ mm^2

Working:

$L = \theta/360 \times 2\pi r = 180/360 \times 2\pi \times 7$

$L \approx 21.99$ mm

$A = \theta/360 \times \pi r^2 = 180/360 \times \pi \times 7^2$

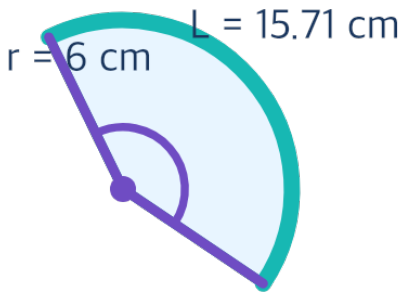

$A \approx 76.97$ mm^2.

EA1

Find A

Answer:

$47.12\ \text{cm}^2$

Working:

Use A = 1/2 rL when radius and arc length are known.

$A \approx 1/2 \times 6 \times 15.71$

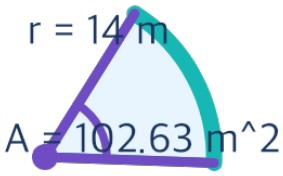

$A \approx 47.12\ \text{cm}^2$.

EB1

Find L

Answer:

14.66 m

Working:

Use A = 1/2 rL when radius and sector area are known.

$L = 2A \div r$

$L \approx 2 \times 102.63 \div 14$

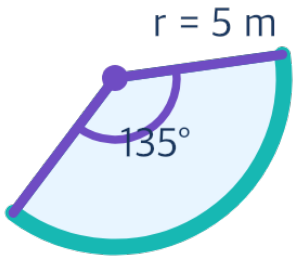

$L \approx 14.66$ m.

EC1

Find L and A

Answer:

$L = 11.78$ m, $A = 29.45$ m^2

Working:

$L = \theta/360 \times 2\pi r = 135/360 \times 2\pi \times 5$

$L \approx 11.78$ m

$A = \theta/360 \times \pi r^2 = 135/360 \times \pi \times 5^2$

$A \approx 29.45$ m^2.
