Bearings · Hidden Bearings

GEO-5B87-L2 · Student pages 1-3. Print at 100%, single-sided. Cut on dashed lines.

SA1

B is 38° east of north from A. Write the bearing of B from A.

Answer:

038°

Working:

Step 1: Translate the compass description into a clockwise bearing from north.

Step 2: Start at north.

Step 3: East of north means turn clockwise from north.

Step 4: 0° + 38° = 38°

Step 5: Write the answer as a three-figure bearing.

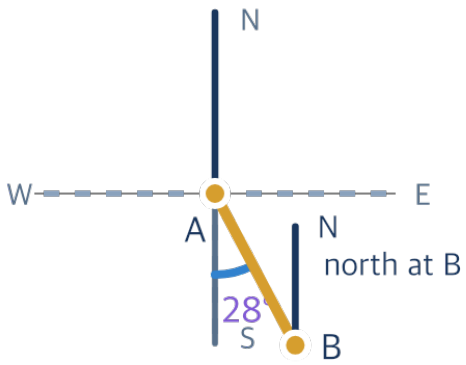

Bearing of B from A = 038°.

SB1

B is 28° east of south from A. Find the bearing of A from B.

Answer:

332°

Working:

Step 1: First find the bearing of B from A.

Step 2: South is a bearing of 180°.

Step 3: East of south means turn anticlockwise from south towards east.

Step 4: 180° - 28° = 152°

Bearing of B from A = 152°.

Step 5: The reverse bearing differs by 180°.

$152° + 180° = 332°$

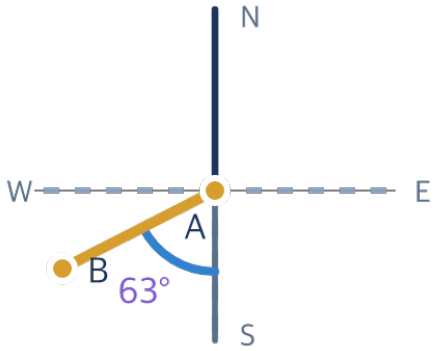

Write the result as a three-figure bearing: 332°.

SC1

B is 63° west of south from A. Write the bearing of B from A.

Answer:

243°

Working:

Step 1: Translate the compass description into a clockwise bearing from north.

Step 2: South is a bearing of 180°.

Step 3: West of south means turn clockwise from south towards west.

Step 4: 180° + 63° = 243°

Step 5: Write the answer as a three-figure bearing.

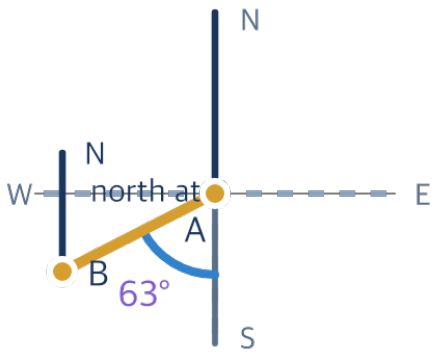

Bearing of B from A = 243°.

SD1

B is 63° west of south from A. Find the bearing of A from B.

Answer:

063°

Working:

Step 1: First find the bearing of B from A.

Step 2: South is a bearing of 180°.

Step 3: West of south means turn clockwise from south towards west.

Step 4: 180° + 63° = 243°

Bearing of B from A = 243°.

Step 5: The reverse bearing differs by 180°.

$243° + 180° = 423°$

$423° - 360° = 63°$

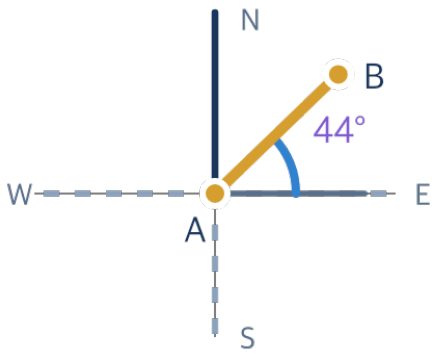

Write the result as a three-figure bearing: 063°.

EA1

B is 44° north of east from A. Write the bearing of B from A.

Answer:

046°

Working:

Step 1: Translate the compass description into a clockwise bearing from north.

Step 2: East is a bearing of 090°.

Step 3: North of east means turn anticlockwise from east towards north.

Step 4: 90° - 44° = 46°

Step 5: Write the answer as a three-figure bearing.

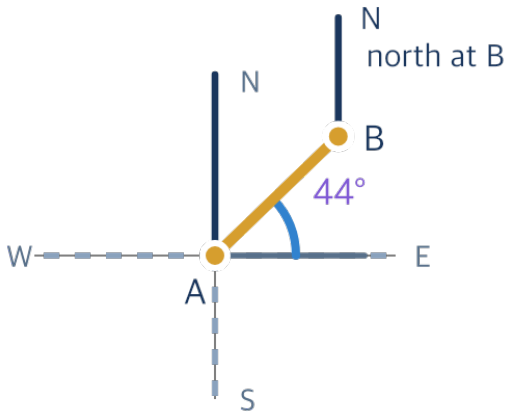

Bearing of B from A = 046°.

EB1

B is 44° north of east from A. Find the bearing of A from B.

Answer:

226°

Working:

Step 1: First find the bearing of B from A.

Step 2: East is a bearing of 090°.

Step 3: North of east means turn anticlockwise from east towards north.

Step 4: 90° - 44° = 46°

Bearing of B from A = 046°.

Step 5: The reverse bearing differs by 180°.

$46° + 180° = 226°$

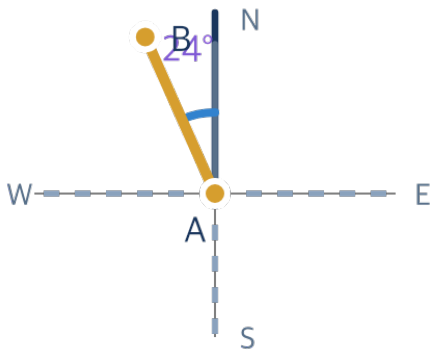

Write the result as a three-figure bearing: 226°.

EC1

B is 24° west of north from A. Write the bearing of B from A.

Answer:

336°

Working:

Step 1: Translate the compass description into a clockwise bearing from north.

Step 2: Start at north.

Step 3: West of north means turn anticlockwise from north.

Step 4: 360° - 24° = 336°

Step 5: Write the answer as a three-figure bearing.

Bearing of B from A = 336°.
