Decimal Place Value and Operations · Decimal Operations

NUM-8DC6-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

Calculate: 183.9 - 15.4

Answer:

168.5

Working:

Align decimal points vertically.

183.9 - 15.4 ------ 168.5

Add or subtract from right to left.

Place the decimal point in the answer.

Result = 168.5

S2

Calculate: 0.96 × 1000

Answer:

960

Working:

Identify the power of 10.

$1000 = 10^3$

Shift the digits through the fixed decimal point.

Multiplying by a power of 10 shifts the digits 3 places left into larger place-value columns. The decimal point stays fixed between ones and tenths.

$0.96 \rightarrow 960$

Write the calculation.

$0.96 \times 1000 = 960$

NUM-8DC6-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S3

Calculate: 78.4 ÷ 10

Answer:

7.84

Working:

Identify the power of 10.

$10 = 10$

Shift the digits through the fixed decimal point.

Dividing by a power of 10 shifts the digits 1 place right into smaller place-value columns. The decimal point stays fixed between ones and tenths.

$78.4 \rightarrow 7.84$

Write the calculation.

$78.4 \div 10 = 7.84$

S4

Calculate: 3.1 × 0.98

Answer:

3.038

Working:

Ignore decimals and multiply the integers.

$31 \times 098 = 3038$

Total decimal places = 3 (1 + 2).

Place the decimal point 3 places from the right.

$3038 \rightarrow 3.038$

Write the calculation.

$3.1 \times 0.98 = 3.038$

NUM-8DC6-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

E1

Calculate: 71 ÷ 2

Answer:

35.5

Working:

Set up the division.

71 ÷ 2

Divide using decimal place value.

71 ÷ 2 = 35.5

Check the size of the answer.

35.5 is close to 36, which is reasonable because 71 ÷ 2 is about 71 ÷ 2.

E2

Calculate: 187.67 + 62.79

Answer:

250.46

Working:

Align decimal points vertically.

187.67 + 62.79 ------- 250.46

Add or subtract from right to left.

Place the decimal point in the answer.

Result = 250.46

E3

Calculate: 2.25 × 1000

Answer:

2250

Working:

Identify the power of 10.

$1000 = 10^3$

Shift the digits through the fixed decimal point.

Multiplying by a power of 10 shifts the digits 3 places left into larger place-value columns. The decimal point stays fixed between ones and tenths.

2.25 → 2250

Write the calculation.

$2.25 \times 1000 = 2250$
