Addition, Subtraction, Multiplication and Division · Real-World Problems

NUM-3285-L4 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

A shop sells apples for £11 per bag. If you buy 11 bags, how much will it cost?

Answer:

£121

Working:

Step 1: Identify the operation

Cost per bag × number of bags = total cost

Step 2: Substitute the values

£11 × 11

Step 3: Calculate

£11 × 11 = £121

S2

A journey takes 4 hours and covers 188km. What is the average speed per hour?

Answer:

47km/h

Working:

Step 1: Choose the operation

Average speed = distance ÷ time

Step 2: Substitute the values

188 ÷ 4

Step 3: Calculate

188 ÷ 4 = 47km/h

S3

A builder needs 91 bricks. They come in packs of 7. How many packs are needed?

Answer:

13 packs

Working:

Step 1: Identify the operation needed

This is a division problem.

Step 2: Set up the calculation

91 ÷ 7

Step 3: Evaluate

91 ÷ 7 = 13 packs

S4

A shop sells apples for £9 per bag. If you buy 9 bags, how much will it cost?

Answer:

£81

Working:

Step 1: Identify the operation

Cost per bag × number of bags = total cost

Step 2: Substitute the values

£9 × 9

Step 3: Calculate

£9 × 9 = £81

E1

A recipe serves 8 people and needs 240g of flour. How much flour for 9 people?

Answer:

270g

Working:

Step 1: Find flour per person

240g ÷ 8 = 30g per person

Step 2: Scale up to the new number of people

30g × 9

30 × 9 = 270g

E2

Oliver completes 2 puzzles each day for 29 days. How many puzzles is that?

Answer:

58 puzzles

Working:

Step 1: Identify the operation needed

This is a multiplication problem.

Step 2: Set up the calculation

2 × 29

Step 3: Evaluate

2 × 29 = 58 puzzles

E3

A shop sells apples for £10 per bag. If you buy 8 bags, how much will it cost?

Answer:

£80

Working:

Step 1: Identify the operation

Cost per bag × number of bags = total cost

Step 2: Substitute the values

£10 × 8

Step 3: Calculate

£10 × 8 = £80
