KAIZEN MATHS

Lesson starter

Integer Operations

Add and Subtract Integers

Name _____

S1

Calculate: -3 + 1

S2

Calculate: 1 - (-2)

S3

Calculate: -15 + (-5)

S4

Calculate: -2 - 10

Teacher answers & working

Integer Operations · Add and Subtract Integers

NUM-6A82-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

Calculate: -3 + 1

Answer:

-2

Working:

Step 1: Start at the first integer.

Start at -3.

Step 2: Use the sign of the second integer to decide the direction.

Adding 1 means move 1 places right.

-5-4-3-2-10

Step 3: Read the final position.

$-3 + 1 = -2$

S2

Calculate: 1 - (-2)

Answer:

3

Working:

Step 1: Change subtraction into addition of the opposite.

$1 - (-2) = 1 + 2$

Step 2: Now add the opposite integer.

Adding 2 means move 2 places right.

-1012345

Step 3: Read the final position.

$1 - (-2) = 3$

Teacher answers & working

Integer Operations · Add and Subtract Integers

NUM-6A82-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S3

Calculate: -15 + (-5)

Answer:

-20

Working:

Step 1: Start at the first integer.

Start at -15.

Step 2: Use the sign of the second integer to decide the direction.

Adding -5 means move 5 places left.

Step 3: Read the final position.

-15 + (-5) = -20

S4

Calculate: -2 - 10

Answer:

-12

Working:

Step 1: Change subtraction into addition of the opposite.

-2 - 10 = -2 + (-10)

Step 2: Now add the opposite integer.

Adding -10 means move 10 places left.

-12-11-10-9-8-7-6-5-4-3-2-10

Step 3: Read the final position.

-2 - 10 = -12

E1

Calculate: -15 + (-11)

Answer:

-26

Working:

Step 1: Start at the first integer.

Start at -15.

Step 2: Use the sign of the second integer to decide the direction.

Adding -11 means move 11 places left.

Step 3: Read the final position.

-15 + (-11) = -26

Teacher answers & working

Integer Operations · Add and Subtract Integers

NUM-6A82-L2 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

E2

Calculate: -10 - 7

Answer:

-17

Working:

Step 1: Change subtraction into addition of the opposite.

-10 - 7 = -10 + (-7)

Step 2: Now add the opposite integer.

Adding -7 means move 7 places left.

-12-11-10-9-8

Step 3: Read the final position.

-10 - 7 = -17

E3

Calculate: -13 + 5

Answer:

-8

Working:

Step 1: Start at the first integer.

Start at -13.

Step 2: Use the sign of the second integer to decide the direction.

Adding 5 means move 5 places right.

-12-11-10-9-8-7-6

Step 3: Read the final position.

-13 + 5 = -8
