KAIZEN MATHS

Lesson starter

Integer Operations

Multiply, Divide, and BIDMAS

Name _____

S1

Calculate: 8 × 7

S2

Calculate: -10 + (-3) × 8 - 1

S3

Calculate: -5 × 9

S4

Calculate: 2 + (-3) × 5 - (-3)

Teacher answers & working

Integer Operations · Multiply, Divide, and BIDMAS

NUM-6A82-L3 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

Calculate: 8 × 7

Answer:

56

Working:

Step 1: Multiply the sizes without the signs.

$8 \times 7 = 56$

Step 2: Decide the sign.

The signs are the same, so the answer is positive.

Step 3: Combine the sign and the size.

$8 \times 7 = 56$

S2

Calculate: -10 + (-3) × 8 - 1

Answer:

-35

Working:

Step 1: Multiply before adding or subtracting.

$-3 \times 8 = -24$

Step 2: Substitute that result back into the expression.

$-10 + (-24) - 1$

Step 3: Change subtraction into adding the opposite if useful, then work left to right.

$-10 + (-24) - 1 = -35$

S3

Calculate: -5 × 9

Answer:

-45

Working:

Step 1: Multiply the sizes without the signs.

$5 \times 9 = 45$

Step 2: Decide the sign.

The signs are different, so the answer is negative.

Step 3: Combine the sign and the size.

$-5 \times 9 = -45$

S4

Calculate: 2 + (-3) × 5 - (-3)

Answer:

-10

Working:

Step 1: Multiply before adding or subtracting.

$-3 \times 5 = -15$

Step 2: Substitute that result back into the expression.

$2 + (-15) - (-3)$

Step 3: Change subtraction into adding the opposite if useful, then work left to right.

$2 + (-15) - (-3) = -10$

E1

Calculate: -8 × 5

Answer:

-40

Working:

Step 1: Multiply the sizes without the signs.

$8 \times 5 = 40$

Step 2: Decide the sign.

The signs are different, so the answer is negative.

Step 3: Combine the sign and the size.

$-8 \times 5 = -40$

E2

Calculate: -1 + (-7) × 1 - (-4)

Answer:

-4

Working:

Step 1: Multiply before adding or subtracting.

$-7 \times 1 = -7$

Step 2: Substitute that result back into the expression.

$-1 + (-7) - (-4)$

Step 3: Change subtraction into adding the opposite if useful, then work left to right.

$-1 + (-7) - (-4) = -4$

E3

Calculate: -12 × 3

Answer:

-36

Working:

Step 1: Multiply the sizes without the signs.

$12 \times 3 = 36$

Step 2: Decide the sign.

The signs are different, so the answer is negative.

Step 3: Combine the sign and the size.

$-12 \times 3 = -36$
