Teacher answers & working

Integer Operations · Integer Contexts

NUM-6A82-L4 · Student pages 1-2. Print at 100%, single-sided. Cut on dashed lines.

S1

The temperature is -5°C. It changes by 14°C. What is the new temperature?

Answer:

9°C

Working:

Step 1: Represent the change as an integer.

14 means the temperature increases.

Step 2: Add the change to the starting temperature.

$-5 + 14 = 9$

Step 3: Include the unit in the answer.

New temperature = 9°C

S2

A bank balance is £9. The customer deposits £12. What is the new balance?

Answer:

£21

Working:

Step 1: Represent the money change as an integer.

A deposit is +12.

Step 2: Add the change to the starting balance.

$9 + 12 = 21$

Step 3: Interpret the result.

The account has £21.

S3

A diver is at -80 m relative to sea level. The diver moves down 40 m. What is the new position?

Answer:

-120 m

Working:

Step 1: Choose the sign of the movement.

Moving down is -40.

Step 2: Add the movement to the starting position.

$-80 + (-40) = -120$

Step 3: Interpret the sign.

-120 m means 120 m below sea level.

S4

The temperature is 17°C. It changes by -12°C. What is the new temperature?

Answer:

5°C

Working:

Step 1: Represent the change as an integer.

-12 means the temperature decreases.

Step 2: Add the change to the starting temperature.

$17 + (-12) = 5$

Step 3: Include the unit in the answer.

New temperature = 5°C

E1

A bank balance is £67. The customer deposits £50. What is the new balance?

Answer:

£117

Working:

Step 1: Represent the money change as an integer.

A deposit is +50.

Step 2: Add the change to the starting balance.

$67 + 50 = 117$

Step 3: Interpret the result.

The account has £117.

E2

A diver is at -80 m relative to sea level. The diver moves up 75 m. What is the new position?

Answer:

-5 m

Working:

Step 1: Choose the sign of the movement.

Moving up is +75.

Step 2: Add the movement to the starting position.

$-80 + 75 = -5$

Step 3: Interpret the sign.

-5 m means 5 m below sea level.

E3

The temperature is 8°C. It changes by -8°C. What is the new temperature?

Answer:

0°C

Working:

Step 1: Represent the change as an integer.

-8 means the temperature decreases.

Step 2: Add the change to the starting temperature.

$8 + (-8) = 0$

Step 3: Include the unit in the answer.

New temperature = 0°C
