S1

An item costs £97.13. There is a 16% discount, then 8.53% sales tax is added. Find the final price.

Answer:

£88.55

Working:

Discount = 16% of £97.13

Discount = 0.16 × £97.13 = £15.54

Discounted price = £97.13 - £15.54 = £81.59

Sales tax = 8.53% of £81.59

Sales tax = 0.0853 × £81.59 = £6.96

Final price = £81.59 + £6.96 = £88.55

S2

A restaurant bill is £28.32. Add a 17% tip and a 8.81% service charge. Find the total amount to pay.

Answer:

£35.62

Working:

Convert the tip percentage to a decimal: 17% = 17 ÷ 100 = 0.17

Tip = 17% of £28.32 = 0.17 × £28.32 = £4.81

Convert the service charge percentage to a decimal: 8.81% = 8.81 ÷ 100 = 0.0881

Service charge = 8.81% of £28.32 = 0.0881 × £28.32 = £2.49

Total = £28.32 + £4.81 + £2.49 = £35.62

S3

An employee earns £46,195.00 annually. The tax rate is 18.27%. Calculate the net income after tax.

Answer:

£37,755.17

Working:

Convert the tax rate to a decimal: 18.27% = 18.27 ÷ 100 = 0.1827

Tax = 18.27% of £46,195.00

Tax = 0.1827 × £46,195.00 = £8,439.83

Net income = £46,195.00 - £8,439.83 = £37,755.17

S4

An item costs £109.15. There is a 39% discount, then 9.8% sales tax is added. Find the final price.

Answer:

£73.10

Working:

Discount = 39% of £109.15

Discount = 0.39 × £109.15 = £42.57

Discounted price = £109.15 - £42.57 = £66.58

Sales tax = 9.8% of £66.58

Sales tax = 0.098 × £66.58 = £6.52

Final price = £66.58 + £6.52 = £73.10

E1

A restaurant bill is £71.55. Add a 22% tip and a 10.9% service charge. Find the total amount to pay.

Answer:

£95.09

Working:

Convert the tip percentage to a decimal: 22% = 22 ÷ 100 = 0.22

Tip = 22% of £71.55 = 0.22 × £71.55 = £15.74

Convert the service charge percentage to a decimal: 10.9% = 10.9 ÷ 100 = 0.109

Service charge = 10.9% of £71.55 = 0.109 × £71.55 = £7.80

Total = £71.55 + £15.74 + £7.80 = £95.09

E2

An employee earns £44,613.00 annually. The tax rate is 22.49%. Calculate the net income after tax.

Answer:

£34,579.54

Working:

Convert the tax rate to a decimal: 22.49% = 22.49 ÷ 100 = 0.2249

Tax = 22.49% of £44,613.00

Tax = 0.2249 × £44,613.00 = £10,033.46

Net income = £44,613.00 - £10,033.46 = £34,579.54

E3

An item costs £92.52. There is a 15% discount, then 7.73% sales tax is added. Find the final price.

Answer:

£84.72

Working:

Discount = 15% of £92.52

Discount = 0.15 × £92.52 = £13.88

Discounted price = £92.52 - £13.88 = £78.64

Sales tax = 7.73% of £78.64

Sales tax = 0.0773 × £78.64 = £6.08

Final price = £78.64 + £6.08 = £84.72
