S1

A salesperson has a base salary of £25,336.00 plus 4.87% commission on sales. They sold £56,636.00 worth of products. Find their total earnings.

Answer:

£28,094.17

Working:

Convert the commission rate to a decimal: 4.87% = 4.87 ÷ 100 = 0.0487

Commission = 4.87% of £56,636.00

Commission = 0.0487 × £56,636.00 = £2,758.17

Total earnings = £25,336.00 + £2,758.17 = £28,094.17

S2

Calculate simple interest on £1,679.00 at 4.26% per year for 6 years. Find the total amount.

Answer:

£2,108.15

Working:

Use $I = PRT$.

$P = £1{,}679.00$, $R = 0.0426$, $T = 6$

$I = £1{,}679.00 \times 0.0426 \times 6 = £429.15$

This interest is added to the principal.

Amount = £1,679.00 + £429.15 = £2,108.15

S3

A product costs £83.18 to make. The business applies a 54% markup. Find the selling price and profit margin.

Answer:

Selling price: £128.10, profit margin: 35.07%

Working:

Markup = 54% of £83.18 = 0.54 × £83.18 = £44.92

Selling price = £83.18 + £44.92 = £128.10

Profit margin = (£44.92 ÷ £128.10) × 100 = 35.07%

S4

A salesperson has a base salary of £27,448.00 plus 6.53% commission on sales. They sold £77,472.00 worth of products. Find their total earnings.

Answer:

£32,506.92

Working:

Convert the commission rate to a decimal: 6.53% = 6.53 ÷ 100 = 0.0653

Commission = 6.53% of £77,472.00

Commission = 0.0653 × £77,472.00 = £5,058.92

Total earnings = £27,448.00 + £5,058.92 = £32,506.92

E1

Calculate simple interest on £8,607.00 at 5.03% per year for 5 years. Find the total amount.

Answer:

£10,771.66

Working:

Use $I = PRT$.

$P = £8{,}607.00$, $R = 0.0503$, $T = 5$

$I = £8{,}607.00 \times 0.0503 \times 5 = £2{,}164.66$

This interest is added to the principal.

Amount = £8,607.00 + £2,164.66 = £10,771.66

E2

A product costs £56.70 to make. The business applies a 44% markup. Find the selling price and profit margin.

Answer:

Selling price: £81.65, profit margin: 30.56%

Working:

Markup = 44% of £56.70 = 0.44 × £56.70 = £24.95

Selling price = £56.70 + £24.95 = £81.65

Profit margin = (£24.95 ÷ £81.65) × 100 = 30.56%

E3

A salesperson has a base salary of £18,343.00 plus 3.74% commission on sales. They sold £45,348.00 worth of products. Find their total earnings.

Answer:

£20,039.02

Working:

Convert the commission rate to a decimal: 3.74% = 3.74 ÷ 100 = 0.0374

Commission = 3.74% of £45,348.00

Commission = 0.0374 × £45,348.00 = £1,696.02

Total earnings = £18,343.00 + £1,696.02 = £20,039.02
